

DIGITAL LITERACY

COURSE CODE : CSE

WINTER SEMESTER 2026

MRIGANK MISHRA

Register Number : 25BCE10330

Project : Digital Literacy

Project Overview

Welcome to the complete Digital Literacy Portfolio for the CSE0001 course. This repository focuses on the role of a Student Digital Ambassador. The main goal of this project is to empower peers, help them navigate the digital world safely, and support them in building a strong, professional online presence.

The repository is divided into five modules, each addressing a key aspect of modern digital literacy, including visual communication, professional networking, coding collaboration, and cybersecurity.

Module Summaries & Deliverables

Module 1: Create a Digital Literacy Awareness Infographic

Folder: task-1-presentation/

Tool Used: Canva

Summary: A one-page visual resource designed for college students to quickly understand the key aspects of digital literacy.

Key Elements Covered in the Infographic:

- Defining Digital Literacy: Moving beyond basic computer skills to critical thinking and responsible content creation.
- Essential Student Tools: Highlighting productivity apps (Notion, Google Workspace) and academic research tools.
- Safe Internet Practices: Emphasizing strong, unique passwords, 2FA (Two-Factor Authentication), and recognizing secure connections (HTTPS).
- Curating an Online Presence: Ensuring your digital footprint shows professionalism to future employers.
- Email Etiquette 101: Tips on subject lines, greetings, and concise messaging.

Module 2: Build Your Student Digital Portfolio

Folder: task-2-portfolio/

Summary: This module focuses on moving from being a consumer of digital content to a professional creator. It involves setting up and optimizing a foundational digital presence on platforms that are important for recruiters and the academic community.

Optimized Platforms:

- GitHub: Set up a structured profile with a professional README, pinning key academic projects to show version control and coding habits.
- LinkedIn: Create a detailed profile with a professional photo, an engaging "About" section, education information, and a customized URL.
- Kaggle: Register and create a profile to join data science competitions and access public datasets.

Module 3: Explore Coding & Collaboration Platforms

Summary: This module involves hands-on learning about platforms that help build technical skills and allow for remote collaboration, which are essential today.

- Coding Practice: Get familiar with HackerRank for practicing algorithmic problem-solving and preparing for technical interviews.
- Cloud Collaboration: Use Google Workspace to create, share, and manage documents together.

Deliverable: A custom 'Digital Literacy Awareness Quiz' made to test peers on their knowledge of digital safety and ethics.

Take the Quiz Here: [Digital Literacy Awareness Quiz \(Google Forms\)](#)

Module 4: Draft a Professional Email & Etiquette Guide

Folder: task-4-email-etiquette/

Summary: Learn effective professional online communication. This module includes practical templates and a checklist for student behavior.

Deliverable 1: Email Templates

Template A: Academic Extension Request

Subject: Extension Request for [Assignment Name] - Mrigank Mishra (25BCE10330)

A clear and polite email explaining the situation, suggesting a new deadline, and thanking the professor for their time.

Template B: Internship Inquiry

Subject: Internship Inquiry - B.Tech CSE Student - Mrigank Mishra

A concise email to a recruiter or startup founder, highlighting current skills, attaching a resume or portfolio link, and stating your value.

Deliverable 2: Social Media "Do's and Don'ts" Checklist

DO: Check your privacy settings every three months.

DO: Share your academic achievements and technical projects.

DO: Verify information before sharing sensational news.

DON'T: Post emotionally charged rants about peers or faculty.

DON'T: Share your real-time location.

DON'T: Forget that the internet is permanent (even deleted posts can leave traces).

Module 5: Cybercrime Awareness Case Study & Prevention Guide

Folder: task-5-cybercrime/

Summary: A detailed case study on UPI Fraud and "Part-Time Job" scams on Telegram that target college students looking for extra income.

Case Study Breakdown

- The Threat: Scammers reach out to students offering high-paying, easy remote work (like liking YouTube videos or reviewing products).
- The Mechanism: Students receive a small initial payment to build trust, then are asked to pay a "registration fee" or "upgrade fee" via UPI to access premium tasks. After sending the larger sum, the scammers block them.
- The Impact: Financial loss, compromised bank information, and emotional distress.

Actionable 'Stay Safe Online' Prevention Checklist

- Verify the Source: Don't trust unsolicited job offers through WhatsApp or Telegram.
- The Golden Rule of UPI: Only enter your UPI PIN to send money, not to receive it.
- Zero Upfront Fees: Legitimate employers won't ask you to pay money to secure a job.
- Reporting: Freeze your bank account immediately if compromised.

- Official Action: Report the incident quickly to the National Cyber Crime Reporting Portal or call the helpline at 1930.
